

# The Revelation

## Earth Friendly Green Operating

For the socially and environmentally concerned and responsible roaster.

Or for large production roasters that need to reduce operating costs. You can operate smokeless! and save money doing the RIGHT thing!

Lower your carbon footprint and do what is right for the environment!

Please contact us for information on the first true environmentally friendly roaster on the planet.

Patent Pending

## Features

Available in most standard sizes  
12 Kilo and up.

Profile roaster for less than three quarters of one cent per pound on most models. (except total electric).

The only roaster that will make its own payments on fuel savings.

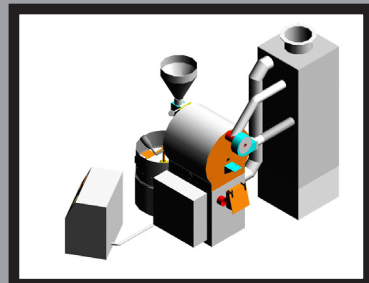

Not an air roaster! Dual heating paths (drum and air).

Wonderful evenly roasted beans like no other can provide. Heating can be a hybrid of non fossil fuels, fossil fuel, electric and fossil fuel, or total electric.

Smoke free electric 12 kilo costs less than .014 cents per pound to operate. NOT .07 cents per pound like conventional antique model gas roasters.

We offer a smoke free 300 kilo at .005!

Use the clean exhaust to help heat the shop if needed or vent to the outside with dampener control.
