One Kilo Lab Roaster.

Patent Pending

American Made, Hand Built Quality

US Roasters Offers hand operation and easy Profiling set up. Upload and download Roasting Profiles from your Notbook, watch the roast happen on the big screen or on the wall Impress your customers with roast profiles developed from master coffee roasters. Ensure the same cup of coffee every time, no matter what location! Share your roasts with our roasting community or between several store locations. Or you can roast manually with full control.

Four Roasts per Hour!

Changeable Drums. Roast coffee, cocoa, peanuts, and more by simply changing the roasting drum. The drum is easy to remove, making cleaning faster and less complicated. Unlike Air Roasters, Drum Roasters allow for dual path heating providing that extra flavor your customers are sure to enjoy!

Energy Saving. This roaster uses approximately 8,000 BTUs (averages 5,000 full load) with the option of electric or gas fuel sources. The fully electric option is 25 amps 220V single phase. Units should be vented.

User Friendly. Now roasting can be as simple as pushing a button! The Mini Rev's User Interface allows for automatic or manual control and is designed for all skill levels. With Downloadable Profiles Just about anyone can Roast Great Coffee! Easiest to operate, and maintain of any roaster!

Cooler with Stirring!

When the profile ends the Roaster Door opens automatically and the stirrer starts!,

Free One-on-one training session is provided in Oklahoma City!
