[1] Allow 18" clearance minimum for service. Dimensions do not include chaff collector with heating chamber positioned behind the roaster. Add 18" (Depth) for Power burners

[2] Use Class A type positive pressure piping

[3] **Special note for Propane or bottled gas.** it is highly recommended for your safety that you purchase a quality propane regulator from a Professional source. You must have the correct regulator for the type of supply that you are connecting the roaster to. Changing supply type can or not having the regulator set to the pressure needs of the roaster or the source can be safety hazard and also damage the roaster. If you have needs for regulator please contact one of our Engineering staff for the correct one.
