

The 3-Kilo Millennium Coffee Roaster

American Made, Hand Built Quality

Product Announcements

NEW FOR 2020! Stainless cooler liner, 4" magnehelic gauges for air flow and gas pressure, digital environmental air temp gauge, and air dampener control at NO CHARGE. Easy service Electric Heater, Improved quiet gear drives and mounts. Drum Speed Drive is included. Set up for data logging!

NEW Microcontroller touchscreen profiler model with real-time graphing and an easy to use interface!

ALL MODELS INCLUDE

- Heavy-duty stainless steel drum, cooler screen, and cooler liner
- Easy to service roaster fan
- Removable cooler for easy cleaning
- Direct drive industrial motors on drum, exhaust fan, cooling fan and stir motor
- Heavy-duty motors with UL 508-A approved industrial control system adjustable overloads and contactors.
- Adjustable legs for ease of leveling
- Safety Clutch system on cooler, no danger of injuries
- Magnetic in Cooler discharge.

SPECIFICATIONS

3 Kilo Model (7.5lb) Coffee Roaster. Four roasts per hour. Designed for easy operation, low maintenance, and a long lifetime. Your choice of several standard colors, trim types and finishes.

- Weight: 450 lbs.
- Total Dimensions¹: 24"x43"x53" (LxWxH) add 14" in length if you use the external cyclone.
- Shipping: 600 lbs 42"x52"x55" (LxWxH)
- Piping²: 4-6" Stainless or Class A
- Gas model averages about 15,000 BTUs with a
- Gas Supply: Nat'l Gas minimum 7" w.c.
Propane or Propane Butane mix 14" w.c.
- USRC designed with highest quality parts and best metals, supported by the people that designed it for roasting award winning coffee.

[1] Allow 18" clearance minimum for service

[2] Vent Class A 4" pipe can also be used with 6" please order the roaster for the vent size needed.

[3] **Special note for Propane or bottled gas**, it is highly recommended for your safety that you purchase a quality propane regulator from a Professional source. You must have the correct regulator for the type of supply that you are connecting the roaster to. Changing supply type can or not having the regulator set to the pressure needs of the roaster or the source can be safety hazard and also damage the roaster. If you have needs for regulator please contact one of our Engineering staff for the correct one.

OPERATION

- 24 volt operator controls for safe operation.
- Even and accurate heat controls;
- Cast iron rectangular burners or industrial electric elements with full chaff collector.
- Standard lighted push button on-off switches, motor starters and overloads with fault protection.
