- Easy to service Roasting Fan. Manometer for accurate air flow control.
- All Stainless Product contacts
- Cooler Stirrer speed control.
- All Millennium Models include gear driven stirrer design.

150 Kilo Power Burner "R" Series Model with Profiler Touch screen w-semi auto. \$281,500.00

Profiler model comes with a PLC based 8" graphical touch screen control and profiling system. PLC system allows for manual "hands on" operation or programmable PLC controls of the temperature, burner output, and airflow of the bean environment, for profiling the roast. You actually train the roaster by setting up the information on the "set up" screen or by roasting and letting the machine run in teach mode. PLC system reports over temperature conditions and provides a water spray when your safe temperature settings are exceeded. Profiler has cool down, turn off, and preheat modes. Model also includes over-heat indicators, electronic flame safety controls, as well as many

other features. Optional integration of afterburner to PLC control is optionally available for lower fuel use. The heat on the R-Series is supplied with a power burner (forced heat style), and our specially designed burner chamber that lowers heat loss while providing a more even roast. The R-Series produces can produce up to four full roasts per hour.

Automatic add on to Profiler

Add \$10,950.00

Automatic add on to Profiler model includes door control system for green hopper, drum door, and cooler discharge allowing the roaster to operate in automatic mode. Also includes a stack light that shows mode of operation. Ready for optional PC communication features like data logging and control room operations. The automatic add on can automate the roasting for you and provide fifteen different programmed profiles without optional memory expansion.
